a **Typed contacts of the deposited complex (data)**

PDB 1MEL, chain A against chain L; residue pairs within 4.5 Å

types: PDBe Arpeggio 1.4.4

Contacts of a deposited complex, not predicted. PDBe Arpeggio 1.4.4.

Sticks: contact residues. Dashed: 9 hydrogen bonds

Interaction type

- h Hydrogen bond
- p Polar contact
- w Weak hydrogen bond
- c Carbonyl contact
- φ Hydrophobic
- π Aromatic ring
- No specific type
- hφ Split: several types
- h* Star: backbone atom on either side

No specific type: within the cut-off, no interaction class reported.

Look for: 55 residue pairs, 9 with a hydrogen bond.
