a Families: sampled fill, dark tone, contrast, role

	fill	dark tone	on white	role
mint	#91D7AB	#317F45	4.9 : 1	antigen, target
rose	#E16F6B	#AC3F3F	5.9 : 1	binder, heavy chain
peri	#9B51E1	#7A29BB	7.3 : 1	light chain
apricot	#FBB153	#9A5600	5.7 : 1	contact patch, epitope
indigo	#1D397B	#1D397B	10.9 : 1	implemented model, tool blocks
violet	#F1C3DD	#9B2D61	7.1 : 1	complexes
grey	#FFEDD1	#151515	18.3 : 1	neutral cards and inputs
full	#FFFFFF	#151515	18.3 : 1	designed, not implemented: white and dashed
green	#01B151	#317F45	4.9 : 1	stage hue: selection
purple	#9B51E1	#7A29BB	7.3 : 1	stage hue: dynamics
maroon	#9B2D61	#9B2D61	7.1 : 1	stage hue: evaluation, held-out set
palemint	#D1F1EB	#317F45	4.9 : 1	data pill
palelilac	#EFCBFF	#7A29BB	7.3 : 1	data pill
palepink	#FFD9D7	#AC3F3F	5.9 : 1	data pill
palesky	#E9F3F9	#1D397B	10.9 : 1	pass zone, good-region shading

b Colour-vision distance of the core roles

CIEDE2000, worst case over normal vision, deuteranopia, protanopia, tritanopia

	mint	rose	peri	apricot	indigo	violet
mint		14.4	43.3	15.0	51.6	15.3
rose	14.4		24.9	14.1	42.1	23.5
peri	43.3	24.9		28.3	20.3	28.1
apricot	15.0	14.1	28.3		65.3	11.5
indigo	51.6	42.1	20.3	65.3		53.1
violet	15.3	23.5	28.1	11.5	53.1	

Smallest value: 11.5

Cells under 10 are shaded.

Never separate two things by red against green alone: add a label, a position or a shape.

White text only where white on the fill reaches 4.4 : 1: peri, indigo, purple, maroon

Fills: sampled from Fig. 8 of Int. J. Mol. Sci. 2025, 26, 9262 (doi 10.3390/ijms26199262, open access); plot colours from Figs 1, 4 and 7
